After the adoption of the Sustainable Development Goals (SDGs), and with massive funding commitments coming out of the Paris climate change discussions, the international community now faces the real work of translating vision and commitment into action. Some countries think the SDGs will make little difference to their development effort; others are anticipating major changes. So are the SDGs more than a PR device? Will they make a difference? What will public, private and non-governmental actors need to do better, more, or differently to achieve the SDGs? Strategy alignment, integration of economic, social and environmental dimensions into decision making and the respect of the core principles of inclusion will be key factors for success. In a universal framework, policy coherence for sustainable development, both domestic and international, is equally essential. What can we learn from the early adopters on the policy shifts needed to accelerate progress?

In 2013 the Development Policy Centre conducted the first ever comprehensive survey of Australia's aid stakeholders, canvasing their views of the Australian aid program. Since then Australian aid has changed dramatically: AusAID is no more, the focus of aid has shifted, and the aid budget has been cut dramatically. In 2015 the Centre re-ran the stakeholder survey, and the data from the two surveys provides a unique opportunity to examine the impacts of these changes. In his presentation ***Terence Wood****, Research Fellow, Development Policy Centre, ANU, will reveal what the 2015 Australian aid stakeholder found. He will look at what has gotten better, and what has gotten worse, and offer suggestions for improving Australian aid.*

DEVELOPMENT POLICY CENTRE

WHO WE ARE

The Development Policy Centre (Devpolicy) was established in September 2010 as a think tank to provide a unique Australian and regional meeting place for researchers and those in the government and non-government sectors working in aid and development policy. We are based at Crawford School of Public Policy in the College of Asia and the Pacific at The Australian National University (ANU).

We research and promote discussion in three distinct but related areas: Australian aid; the Pacific and PNG; and global development policy. Our discussion papers, policy briefs and reports make our research and policy recommendations available for critique, development and use. Our events are fora for the dissemination of findings and the exchange of ideas. Our blog is a platform for debate, analysis and discussion.
