- World Vision
- Rotarian Against Malaria
- Population Services International
- Tribal Foundation
- Exxon
- TOTAL
- Oil Search Limited
Hela Provincial Hospital

Oil Search Foundation
The Tari Experience – The Start

- MSF advises in July 2015 they are winding down
- Drought hits Hela Province at the end of 2015
- Hela Provincial Hospital Board appointed - November 2015
In December 2015 the HPH Board looked at what needed to be done:

- There were NO finance, administration or HR systems in place
- 3 Doctors would be needed to replace the MSF Doctors departing – there would be no surgical capacity without them
- Separate A & E departments would need to be merged
- Separate pharmacy and stores department would need to be merged
- The medical ward was in disrepair and the TB ward had been closed for some time
- Toilets were not working and the hospital ran out of water
- A sustainable water supply needed to be found
- The ceiling in the x-ray and dental clinics were falling down
- 110 ex-MSF staff who were not public servants had to be contracted to maintain services
- A new structure with 180 people needing to be recruited including a complete executive management team
- Budget for the hospital in 2015 was **600K**
- The Family Support Centre was in danger of having no sustainable funding or staffing
- Squatters in hospital housing
The Tari Experience – Working in Partnership

Everyone played their role
From this
To This
Partnership Effectiveness

* Working together the Partners were able to:
  * Build a strong Board with effective governance processes
  * Recruit a Executive team and place them on performance contracts
  * Implement a strong and robust financial management system
  * Employ Doctors and nurses through a volunteer program
  * Contract the ex-MSF staff till a full recruitment process was undertaken
  * Recruit over 140 people onto the Allesco payroll – In less than three months
  * Integrate and refurbish the pharmacy and medical supplies stores
  * Bring running water to wards and clinics
  * Open TB Wards
  * Refurbish the medical ward and give children a separate ward on their own
  * Build a sustainable water supply and soon a fully reticulated water system throughout the hospital
From January to September 2016:

- 3,947 Admissions
- 26,305 Outpatients presentations
- 635 Patients had surgery
- 926 Women had babies at the hospital
- 43 of these women needed emergency C-Sections
- The Family Support Centre sees 100 new clients a month
What’s Next for the Partnership
