Asian Development Bank, Manila
ADB Developing Member Countries in the Pacific

Map showing the locations of ADB Developing Member Countries in the Pacific region, including Papua New Guinea, Timor-Leste, Federated States of Micronesia, Marshall Islands, Nauru, Solomon Islands, Vanuatu, Fiji, Tonga, Samoa, and Cook Islands.
International and regional developments

Unemployment rates (% of labor force)

- Improving global economy...
  - Stronger US and Euro area
  - Stable developing Asia
  - Accelerations in Australia and New Zealand
  - ... but risks from possible escalation of ongoing conflicts

- Pacific trade and tourism off to good start in 2014

- Improving conditions in most overseas markets for Pacific workers
Overall trends in the Pacific

- Growth performance remains mostly in line with outlook presented in *Asian Development Outlook 2014* (released in April)
- Regional growth strengthening in 2014 & 2015
- Inflation also rising
- PNG and other larger economies lead regional growth trend
- But, in a few economies, growth outlook diminished by country-specific developments in early 2014 (despite improving global economy)
Pacific Outlook: Growth

GDP growth (%)

- Developing Asia: 2011, 5.4%; 2013, 6.1%; 2014p, 8.3%; 2015p, 6.1%
- Central and West Asia: 2011, 4.8%; 2013, 5.4%; 2014p, 4.8%; 2015p, 5.4%
- East Asia: 2011, 21.0%
Assessment based on early 2014 indicators

- Slightly weaker regional growth outlook
- Modest rates of growth to continue in smaller islands

### Projections

- **Pacific region**
- **Pacific islands (excluding PNG and Timor-Leste)**

Regional average masks low growth in smaller economies...
Five growth drivers in the Pacific

- Trends in resource exports and resource depletion
- Public sector performance
  - Expenditure efficiency, delivery public goods (especially basic transport and communication infrastructure to improve connectivity)
- Tourism sector growth and leakage
- Overseas employment and remittances
- Evolving aid levels and relationships
Largest Pacific economies
(Fiji, Papua New Guinea, Solomon Islands, Timor-Leste)

- For largest economies, challenge is to sustain growth and broaden the distribution growth benefits.

<td>8.5</td>
<td>8.5</td>
</tr>
</tbody>
</table>

### Fiscal and Trade Balances

- **Oil Revenue**: $3.1 billion
- **Other Taxes**: $150 million
- **Budget Surplus**: $2.1 billion
- **Petroleum Fund**: +$14.9 billion
- **Exports of goods and services** increased but imports grew faster → trade deficit +$1.74 billion
- **Deficit financed with oil royalties**

Current Account surplus $1.9 bil. (125% non-oil GDP)

### 2014 & 2015

- Capital investment plans scaled back, but 2014 budget still ambitious: 38% increase in recurrent and 47% increase in capital spending
- Non-oil GDP growth at 8.5% in 2014 and 2015
- Growth and inflation outcomes highly dependent on budget execution
Private sector growth moderating in 2014 as external and internal balances shifting

- Private sector activity appears to be slowing...
  - Fall in rate of growth credit to the private sector
  - Tax revenues down
- Public spending recovering, but from low base
  - 2013 Budget underspent
  - Broader economic impact of underspending still uncertain (recent revisions to historical figures in Natl. Accounts)

**Shifting long term balances**
Solomon Islands: Economy hurt by severe flooding adding to resource export troubles

- Problems in resource exports -- declining logging stocks and mining growing but prices low
- Declining fiscal space
- Tropical Cyclone Ita hit in April, affecting the capital and neighboring provinces
- Production of key commodities was generally strong before the cyclone
- Damage to infrastructure links seen to depress economy for next few months (at least)

<table>

</tbody>
</table>

Log exports and prices (quarterly)

- '000 cubic meters (lhs)
- $ per cubic meter (rhs)
Fiji

- Economy picking up ahead 17 September election
- Credit and investment expansion
- Concerns about fiscal sustainability of recent government policies
- Development partner and investor re-engagement
- “Game changer” for the Pacific in coming years?

<table>

<tr>
<td>Tonga</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Vanuatu</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- Economies generally “underperforming”
- Relatively large public sectors limiting fiscal space
  - SOE reforms to level playing field, foster competition, and reduce fiscal burden
  - Business environment and regulatory reforms
- Fiscal space needed to increase resilience to external shocks

---

*ADB*
North Pacific: RMI, FSM, and Palau

- Struggle to develop greater private sector sources of growth
- Improve connectivity (ports, ICT)
- Carving out niche markets
  - Niche products profitable despite high transport costs
  - Palau: high-end ecological and diving destination tourism
- Fiscal adjustments to prepare for 2023.

### GDP growth (% p.a.)

<td><strong>1.9</strong></td>
<td><strong>1.2</strong></td>
</tr>
</tbody>
</table>
Visitor arrivals remained weak in the 1st quarter of (fiscal) year.

Early signs of recovery in recent months.

Resumption of previously suspended flight connections seen to spur arrivals.

Capacity constraints in increasing tourism arrivals?
Small island economies: Kiribati, Nauru, and Tuvalu

- Vessel day scheme boosting fishing license revenues – creating opportunity to restore fiscal buffers
  - Reduce reliance on ODA
  - Intergenerational equity
- Nauru – RPC windfall
  - primary phosphates almost mined out; secondary reserves projected to last 10 - 20 years

### GDP growth (% p.a.)

<td>2.8</td>
<td>2.0</td>
</tr>
</tbody>
</table>
Lower-than-expected price pressures in a few economies

- **Timor-Leste**: slowing growth (and the effect of methodological adjustments)
- Also in **Cook Islands, PNG, and Samoa**

Conversely, upward pressures in other countries

- **Palau**: adjustments in tobacco taxes, medical fees
- **Solomon Islands**: supply disruptions from flooding
Lower price pressures also seen to accompany the weaker growth outlook.
Risks and issues

- Australia’s economic performance
- Elections – Fiji, Solomon Islands, Tonga
- Fragility
  - Natural disasters, undiversified exports, global climate change impacts
- Major commodity price changes
- Impact of global economic developments
  - First and second round effects
Final words... A longer view

- Outside resource export fueled growth, the near-term growth outlook for Pacific economies continues to be modest – but there are new/growing opportunities

- ADB research into longer run growth engines in the Pacific (Evolving economic linkages research):
  - Trends in resource exports and resource depletion
  - Public sector performance – public service delivery including infrastructure for connectivity
  - Tourism sector
  - Overseas employment and remittances
  - Evolving aid levels and relationships
ADB working with countries to fund projects and programs, and work on technical assistance, to sustain current drivers of growth, and identify and develop new growth engines.
