Some results...

**CENTRE FOR
HUMANITARIAN
LEADERSHIP**

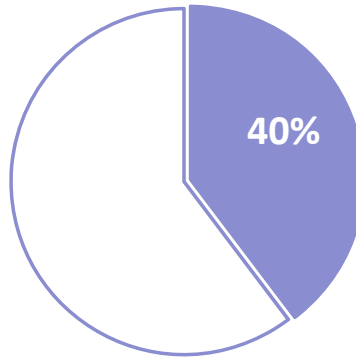

In my organization, readiness for action on climate change and health is evidenced by:

None / I don't know

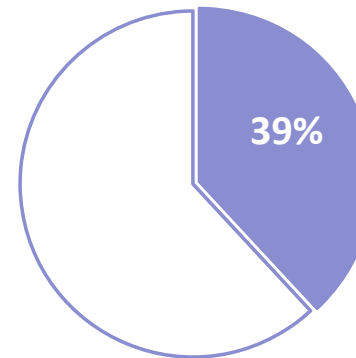

Number organisational programs identified

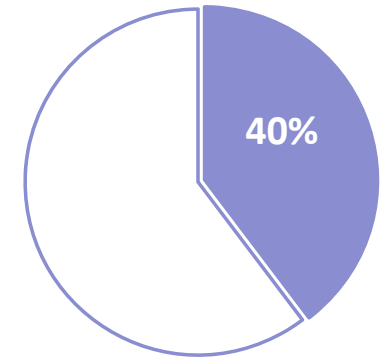

Strategies and policies on health and climate

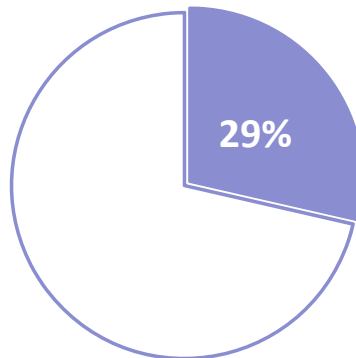

Active measures to reduce our carbon footprint

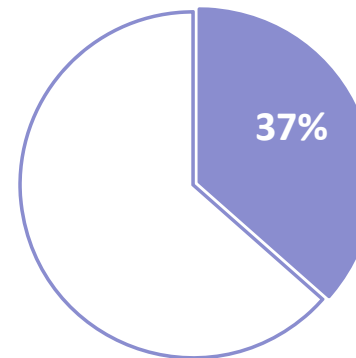

Training for climate specific health outcomes

Increased workforce capacity e.g. surge, climate focal point

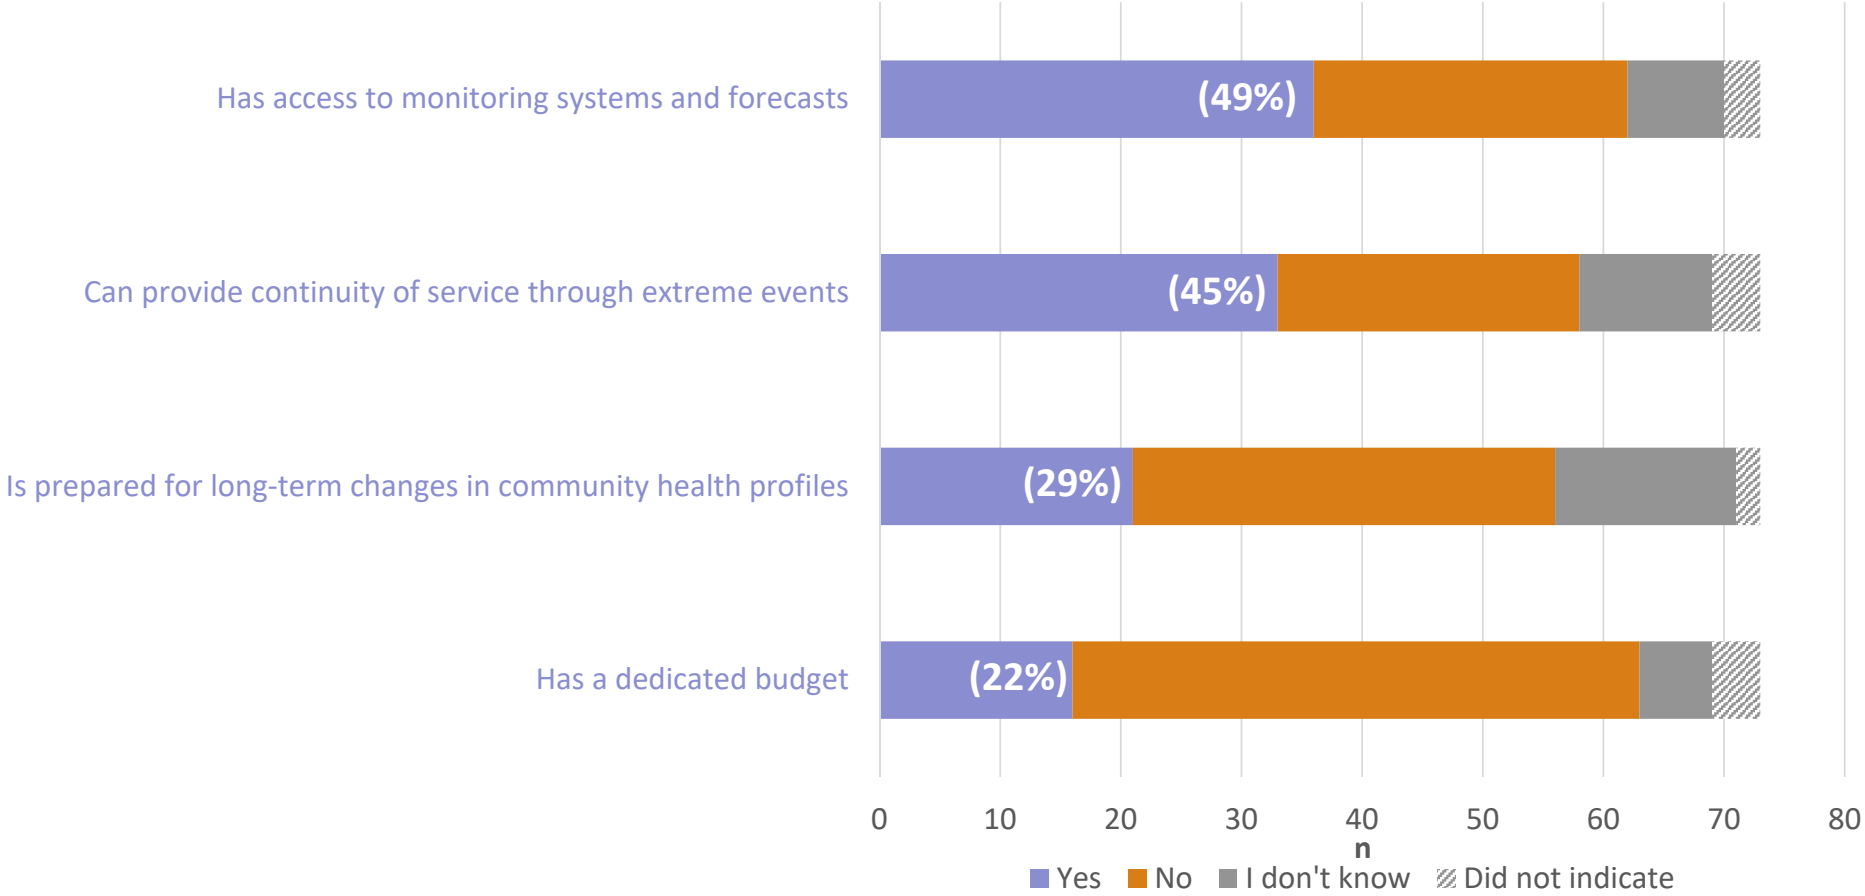

Investment in Climate Change and Health Research

Survey data
n = 63

In being prepared for climate challenges, I / my team:

Survey data
n = 73

In depth: Organisational Barriers

71%

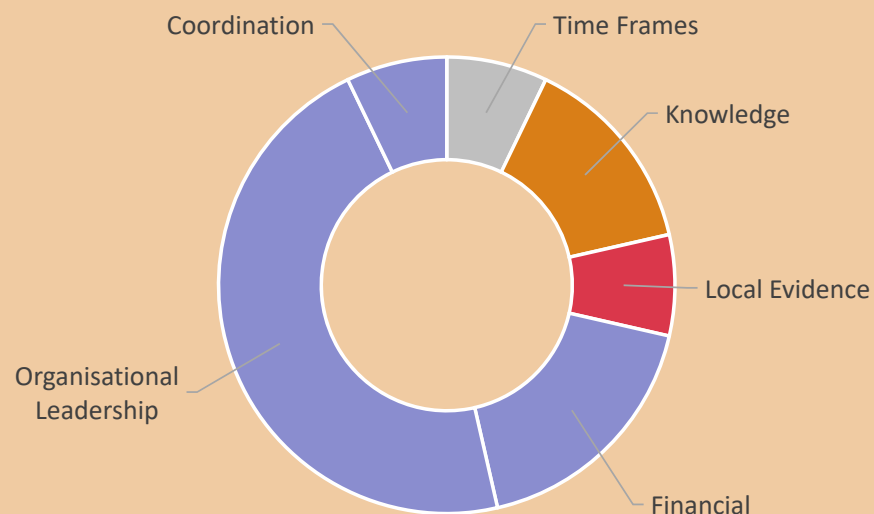

Organisational

Greater than 70% relate to organisational barriers including organisational will, strategy, prioritisation, funding and coordination

29%

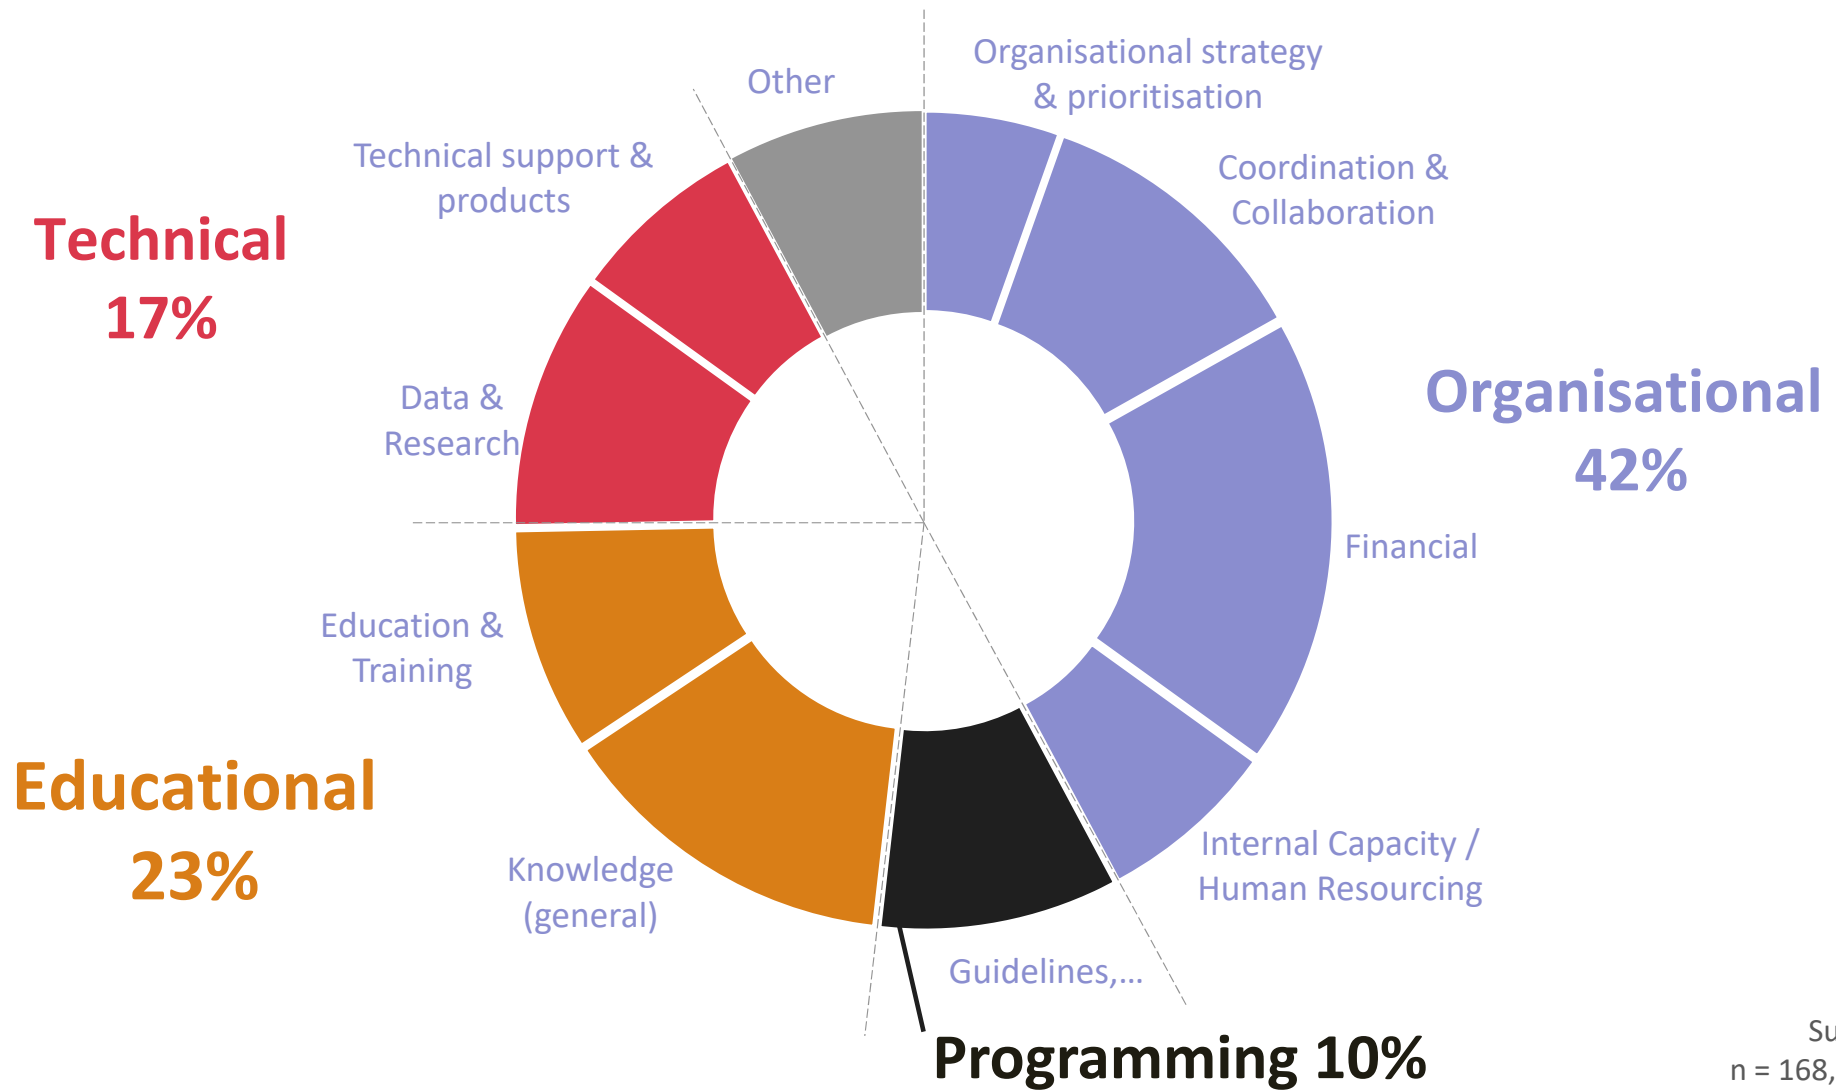

Technical

Less than 30% relate to technical barriers such as knowledge, evidence base and time frames (arguably “time frames” could be considered organisational)

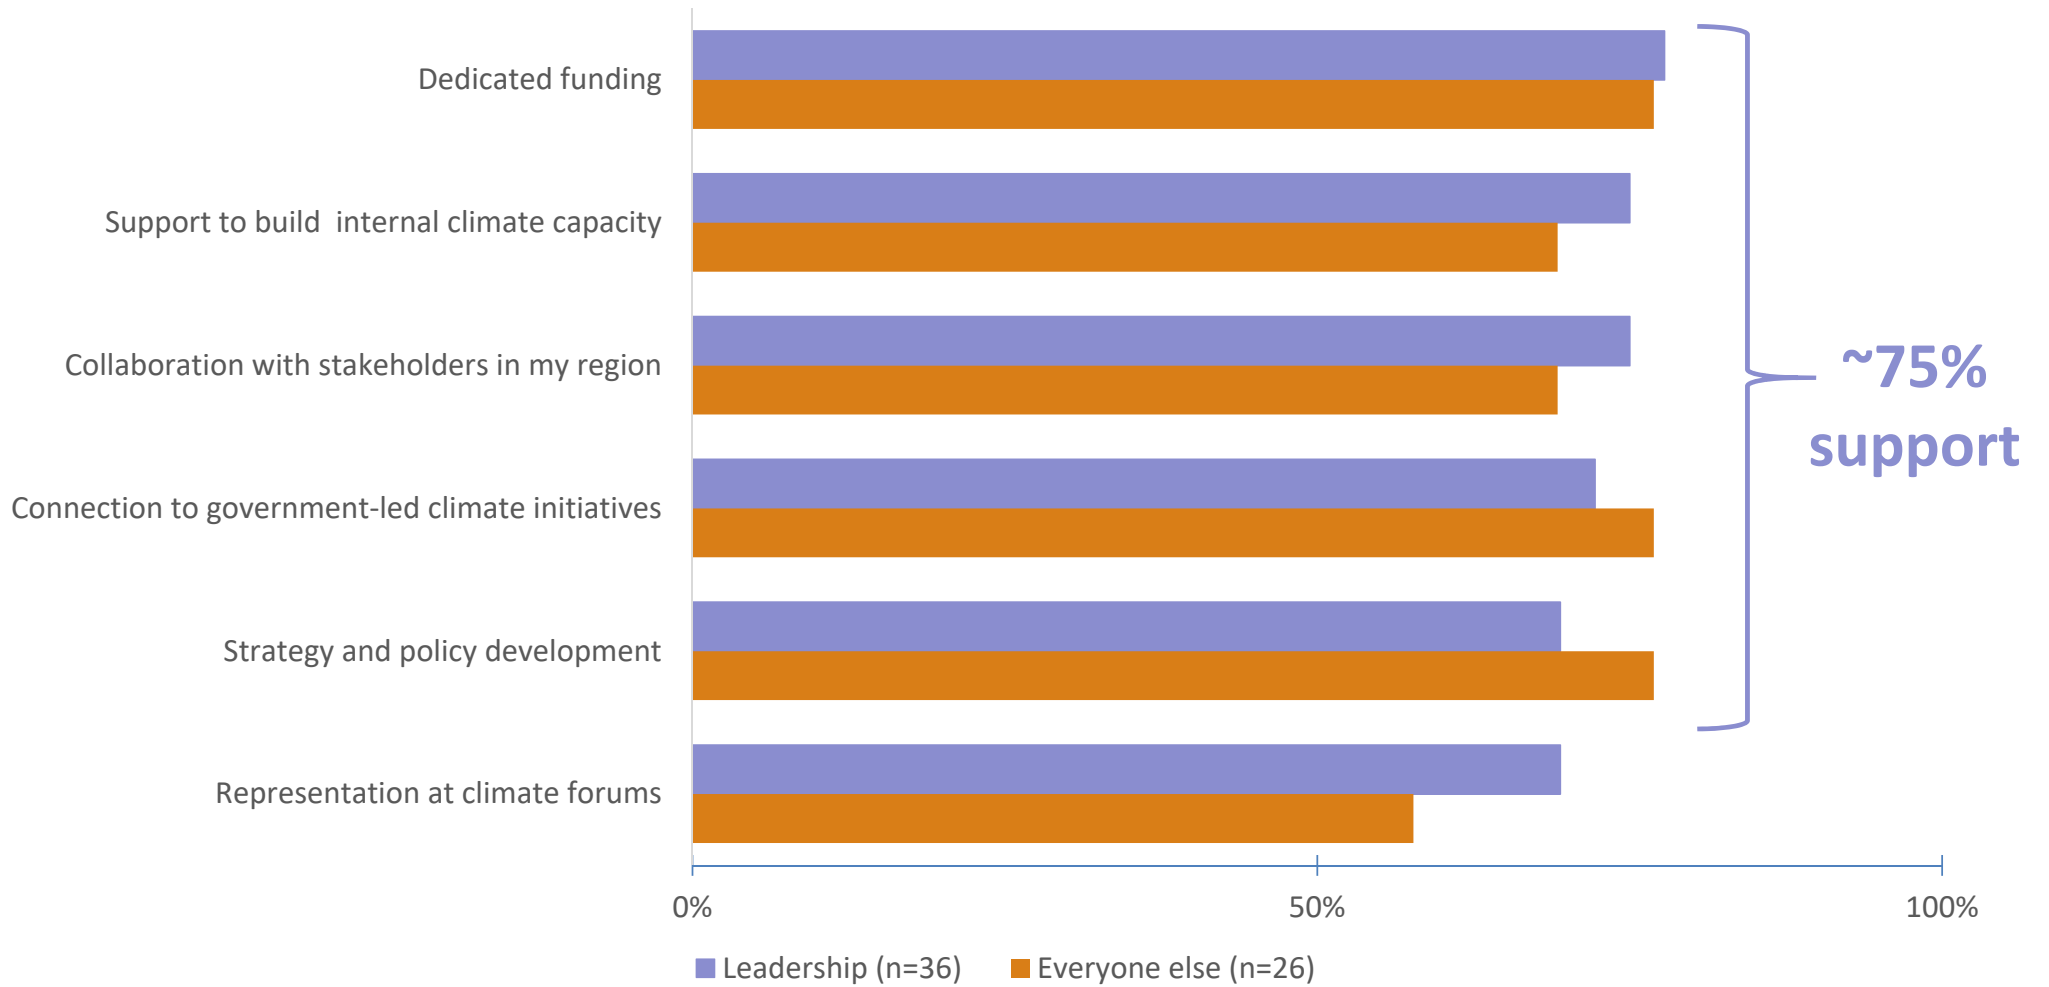

Focus group data
n=26

What top-three resources would help your organisation better prepare for climate change?

Survey data
n = 168, 56 respondents

Leaders in my sector could respond to climate challenges better with:

Survey data
n = 62

Concluding thoughts...
