Some [interesting research](#) on the Washington Post Monkey Cage blog examines the barriers to evidence-based policy in developing countries.

A [fascinating article](#) on Devex highlights historical trends in public opinion about aid in the United States.

Annmaree O’Keeffe offers some [insightful remarks](#) on the “totally preventable catastrophe” that is the cholera epidemic in Yemen.

The [latest edition](#) of the Aid Worker Security Report, which compiles statistics on major incidents of violence against aid workers, finds the number of attacks in 2016 remained steady as compared to 2015. Chapter 2, which presents excerpts from interviews with representatives of Al Shabaab, the Taliban, and Haqqani Network about how they view aid organisations, is particularly interesting.

A [new article](#) published in PLoS ONE presents an updated cost-effectiveness analysis of 93 health interventions in low- and middle-income countries.

Author/s:

Camilla Burkot

Camilla Burkot was a Research Officer at the Development Policy Centre, and Editor of the Devpolicy Blog, from 2015 to 2017. She has a background in social anthropology and holds a Master of Public Health from Columbia University, and has field experience in Eastern and Southern Africa, and PNG. She now works for the Burnet Institute.

Terence Wood

Terence Wood is a Fellow at the Development Policy Centre. His research focuses on political governance in Western Melanesia, and Australian and New Zealand aid.
